

## Experienced Environmental Laboratory Technician

To apply for this position, please send an email to [hiring@northeastlab.com](mailto: hiring@northeastlab.com). Emails that contain the following will receive a response from us:

- 1) Subject: NEL0921 - Lab Tech Application
- 2) Your resume as a PDF
- 3) A cover letter describing in your own words why you would be a good fit for our company

Building on over 30 years of experience, Northeast Environmental Laboratory, Inc. provides a wide range of environmental services, including chemical and microbiological analyses, sampling, consulting, engineering, and regulatory compliance monitoring. We are seeking a committed and dependable person to join our team.

This is a full-time position. Approximately two hours of weekend work per month may be required.

### What's in it for you:

- A full-time, salaried position with competitive pay, great benefits, and growth potential
- A unique, multifaceted position that will keep you busy and give you room to grow
- Training in laboratory analysis and laboratory operations support
- Working with a great team of environmental professionals committed to helping each other succeed
- Health insurance with premiums paid 100% by the company
- Paid time off
- Highly competitive retirement plan for employees who stay with the company at least one year
- Potential to earn annual bonuses based on company profits and your performance

### Some of your responsibilities would include:

- Sample preparation
- Metals analyses using ICP and AA spectrophotometry
- Instrumentation analyses, data evaluation, quality control
- Quantifying inorganic compounds (metals, nutrients, etc.)
- Performing wet chemistry and microbiological analyses
- Generating and reviewing analytical reports
- Providing customer service via phone, email, and in person
- Receiving, logging in, and managing samples
- Reviewing laboratory chains of custody for accuracy
- Entering and reviewing data
- Maintaining a safe, clean, well-organized working environment

### All candidates for this position must have:

- A good memory and a keen attention to detail
- An ability to multitask
- Solid laboratory skills and prior experience with chemical analyses
- A record of commitment and dependability
- A flexible, enthusiastic, and self-motivated personality
- Excellent interpersonal skills, positive attitude, and the ability and desire to work in a team
- The ability to analyze qualitative and quantitative data and draw insightful conclusions
- Knowledge of laboratory safety practices
- A strong command of the English language, both spoken and written
- Strong computer skills, preferably Apple/Macs

### Preferred candidates will have:

- Five years experience working in a professional laboratory
- Experience with wet chemistry procedures (ie.: biochemical oxygen demand, pH, alkalinity, and conductivity)
- Experience with customer service
- Experience working for small businesses
- Comfort with and motivation to troubleshoot and maintain laboratory equipment
- Experience with Flame AA, GFAA, ICP analysis for metals.

### Education and Qualifications:

- At least five years of professional experience (a maximum of one year of academic or internship experience may be applied to the five-year requirement)
- BS in science background, chemistry preferred
